Important notices

The Scheme Booklet

On 9 January 2023, the Federal Court made orders requiring (a) the dispatch to SMX Shareholders and SMX Optionholders of a Scheme Booklet and other materials and (b) the convening of meetings for both the "Scheme" and "Option Scheme" (as defined within the Scheme Booklet).

The Scheme Booklet set out details of the Scheme, Option Scheme and Capital Reduction, and constitutes the explanatory statement for the Schemes for the purposes of section 412(1) of the *Corporations Act 2001* (Cth) (**Corporations Act**). It explains the effect of the Schemes between Security Matters Limited ACN 626 192 998 (**SMX** or the **Company**) and the SMX Shareholders to be considered at the Scheme Meeting, the Option Scheme Meeting and the General Meeting.

You should refer to the Scheme Booklet.

If you have not received a copy of the Scheme Booklet, you should contact SMX to be provided with a copy either by email link or by post.

Supplementary disclosure

The Court also made orders allowing SMX to apply for orders to make supplementary disclosure to SMX Shareholders and SMX Optionholders.

On 27 January 2023, the Court made orders, permitting SMX to make that supplementary disclosure.

This supplementary disclosure document contains that supplementary disclosure and contains several updates to the Scheme Booklet.

ASIC and ASX

A copy of this supplementary disclosure document has been provided to and examined by ASIC. Neither ASIC nor any of its officers take any responsibility for the contents of the supplementary disclosure document.

A copy of this document has also been lodged with ASX. Neither ASX nor any of its officers take any responsibility for the contents of this document.

Federal Court Notice

IMPORTANT NOTICE ASSOCIATED WITH COURT ORDER UNDER SECTION 411(1) OF THE CORPORATIONS ACT 2001

The fact that under section 411(1) of the *Corporations Act* the Court has ordered that the meetings be convened and has approved the explanatory statement required to accompany the notices of the meeting for each of the Scheme Meeting and the Option Scheme Meeting does not mean that the Court:

- (a) has formed any view as to the merits of the proposed schemes or as to how SMX Shareholders and SMX Optionholders should vote (on this matter, SMX Shareholders and SMX Optionholders must reach their own decision); or
- (b) has prepared, or is responsible for, the content of the explanatory statement in each of the notices of meeting for the Scheme Meeting and the Option Scheme Meeting or for this supplementary disclosure document.

Investment decisions

The information contained in this supplementary disclosure document does not constitute financial product advice.

The supplementary disclosure document, and the Scheme Booklet, do not take into account the investment objectives, financial situation or particular needs of individual SMX

Shareholders, SMX Optionholders or any other person. Independent financial and taxation advice should be sought before making any decision in relation to each of the Scheme or Option Scheme.

Responsibility statement

Except as provided below, the information in this supplementary disclosure document has been prepared by SMX and its directors and is the responsibility of SMX. Neither Empatan PLC (registered number 722009) (**Empatan**), Lionheart III Corp (**Lionheart**) nor their respective directors, officers or advisers assume any responsibility for the accuracy or completeness of the SMX Information.

Nexia Australia has prepared the supplementary expert's report in Annexure B and is responsible for that report only. None of SMX or Empatan nor any of their respective affiliates, subsidiaries, directors, officers, employees or advisers assume any responsibility for the accuracy or completeness of the information contained in the supplementary independent expert's report.

Further supplementary expert's report

As explained further below, if Lionheart's "redemption rate" is above 85%, Nexia Australia will prepare a **further** supplementary expert's report. If it is made, that further report will **not** be sent to you. Instead, it will be posted on SMX's website, on SMX's ASX portal, and on the portals for the scheme meetings.

Forward-looking statements

Certain statements in this supplementary disclosure document relate to the future. Forward-looking statements can be identified by the use of forward-looking words such as "may", "should", "expect", "anticipate", "estimate", "scheduled" or "continue," their negative equivalent, or comparable terminology. Such statements involve known and unknown risks, uncertainties, assumptions and other important factors that may cause the actual results, performance or achievements of SMX to be materially different from the results, performance or achievements expressed or implied by such statements. The operation and financial performance of SMX is subject to various risks and which may be beyond the control of SMX, Empatan or Lionheart. As a result, the actual results of SMX's operations and earnings following implementation of each of the Scheme and Option Scheme and the actual advantages of each of the Scheme and Option Scheme may differ from those that are anticipated or may not be achieved.

Any forward-looking statements in this document are made, and reflect views held, only as at the date of this supplementary disclosure document. SMX, Empatan and Lionheart make no representation and give no assurance or guarantee that the occurrence of the events or the achievement of results expressed or implied in such statements will actually occur. You are cautioned not to rely on any forward-looking statement.

Further notices

Further notices and important information are contained in the Scheme Booklet. This includes information in relation to tax, shareholders in specific countries and other matters. You should refer to the Scheme Booklet for that information.

Date

This supplementary disclosure document is dated 27 January 2023.

Updates to the disclosure contained in the Scheme Booklet

Dear SMX Shareholders and SMX Optionholders,

Following the dispatch of the Scheme Booklet, SMX has continued to progress the proposed transaction with Lionheart, and has also continued to operate the company.

Set out below are updates, corrections and further disclosure about the proposed transaction of which the Scheme and the Option Scheme form part.

Terms used in this document have the same meaning as in the Scheme Booklet.

1. Adjustment to meeting dates

In order to allow time for this document to be sent to participants in the Scheme and the Option Scheme, the Court has made orders postponing the Scheme Meeting and the Option Scheme Meeting to **7 February 2023** (rather than 1 February 2023, as originally ordered).

The details of the meetings are otherwise the same, with the same virtual hearing link and access mechanisms that were previously provided to shareholders and relevant optionholders.

The Court has also ordered that the second court hearing date will be heard on **10 February 2023** (rather than 6 February 2023, as originally ordered).

A copy of the Court's order – varying the date of the meetings and the second court hearing date – is attached to this supplementary disclosure document as **Annexure A**.

SMX will make arrangements to postpone the General Meeting, scheduled to be held on the same day as the Scheme Meeting and Option Scheme Meeting (originally 1 February 2023), so that it is also held on **7 February 2023**.

2. Participation in meetings - proxies

Unless you otherwise direct, proxies that you have already given will remain in effect. You can alter, revoke or issue proxies until **9.00am on 6 February 2023**.

You may alter or otherwise deal with your proxies using the link contained in the proxy form that you received with the Scheme Booklet. Those links are as follows:

- for the Scheme Meeting: <https://www.votingonline.com.au/smxsharescheme> ;
- for the Option Scheme Meeting: <https://www.votingonline.com.au/smxoptionscheme>
- for the General Meeting <https://www.votingonline.com.au/smxgm2023>

If you have not received a copy of the Scheme Booklet or a proxy form, you should contact SMX – either by email or by post – to be provided with a copy.

3. Supplementary expert's report

At ASIC's request, in early January 2023, SMX engaged Nexia Australia to provide a supplementary report about the schemes of arrangement.

The supplementary report was commissioned to enable Nexia Australia, as the independent expert, to assess whether, in its view, the transaction remains fair and reasonable and in the best interests of the Shareholders and Optionholders, according to the provisions detailed in its original report (dated 7 October 2022 and annexed to the Scheme Booklet) and taking into account developments since the date of the original report, including the matters set out in section 4 below.

Nexia Australia's supplementary report dated 22 January 2023 is attached to this supplementary disclosure document, as **Annexure B**.

Further supplementary expert's report

As the supplementary report explains, a material assumption of Nexia Australia's analysis is that redemptions from the Lionheart SPAC will be a maximum of 85%. If redemptions are higher than 85%, a **further** supplementary expert's report will be required (unless Nexia Australia decides that such a report is not required).

SMX expects that information about the final rate of redemption from the Lionheart SPAC will be known before the day of Scheme Meeting and the Option Scheme Meeting. Further, it expects to publish that information – on its website and on its ASX announcement page – at or after **9.00am (AEDT) on 31 January 2023**.

Further, if Nexia Australia does issue a further supplementary report, SMX expects to publish the report – at the **same time** and on **the same websites** – as the information about Lionheart's final rate of redemption.

If the final redemption rate is below 85%, or if Nexia Australia decides that a further supplementary report is not required, then only information about the final rate of redemption will be provided.

Important notice

The information about Lionheart's final rate of redemption and any further supplementary expert report by Nexia Australia WILL NOT be sent to you. Rather, you will need to obtain the information from SMX's website (<https://smx.tech/home>, under the "Investor" tab) or from the ASX announcement page for SMX (<https://www2.asx.com.au/markets/company/smx>).

4. Meeting of Lionheart shareholders

Lionheart intends to hold a meeting of stockholders to approve the transaction on **30 January 2023 at 1.00PM, Eastern Time (GMT-5)** (i.e. 5.00AM on 31 January 2023 in Melbourne).

SMX has also been informed, and received confirmation, that the F-4 form lodged by Lionheart with the SEC has been approved. Lionheart's filings from time to time are located on the SEC website, including via the following direct link: <https://www.sec.gov/edgar/browse/?CIK=0001845991&owner=exclude>

SMX has been informed by Lionheart that stockholders wishing to redeem their shares must give notice before the Lionheart Shareholders Meeting.. Lionheart has confirmed that it expects to know the maximum number of redemptions by the morning of 27 January 2023 (US Eastern Time) and will provide this number and percentage to the independent expert, with public disclosure of the information to follow after 4:00pm (US Eastern Time) on 30 January 2023, following the meeting.

SMX expects to publish that information in the manner and at the times described in section 3 above.

5. Issue and exercise of ESOP Options

Isorad Ltd

Paragraphs 5.1(b) and 5.11(c) of the Scheme Booklet disclosed the terms of a commercial agreement between SMX and Isorad Ltd (**Isorad**), including the issue of 864,000 options to Isorad. Despite that agreement, the options were not actually issued to Isorad.

The options have now been issued to Isorad but, because they are ESOP options, will not participate in the Optionholder Scheme. The Isorad options will be cancelled with the same form of consideration along with the other ESOP options in accordance with the terms of the proposed transaction with Lionheart.

Exercise of ESOP options by a former employee

Separately, SMX notes that 77,025 ESOP options issued to a former employee (and included in options described in the Scheme Booklet) have been exercised but that no further shares have been issued to the former employee.

By a deed of variation that modifies the Scheme Implementation Deed, SMX has agreed with the former employee, and with Empatan and Lionheart that these options will be taken to be exercised at Completion, and immediately converted to Empatan shares.

6. Entry into further variation deed

To reflect the grant of the ESOP options to Isorad, the treatment of the exercise of the ESOP options by the former employee and certain other matters, Empatan, Lionheart and SMX have entered a further deed of variation that modifies the Scheme Implementation Deed.

The deed of variation is attached as **Annexure C** to this supplementary disclosure document.

7. Further ASX announcements

Pursuant to its continuous disclosure obligations, since the date of the Scheme Booklet, SMX has made the following further announcements:

	Date	Description of announcement
1.	20 January 2023	Update on business combination with LIONHEART III CORP
2.	17 January 2023	TrueGold using SMX tech received Accreditation from LBMA
3.	12 January 2023	Notification of cessation of securities- SMX
4.	10 January 2023	Court approves Scheme Meeting and Booklet

Each of the announcements is accessible here: <https://www2.asx.com.au/markets/trade-our-cash-market/announcements.smx>

8. Second Court hearing date

By its orders made on 27 January 2023, the Court has adjourned the second court hearing – when it will consider whether to approve the Schemes – at **10.15am on 10 February 2023**.

Under the terms of the transaction, the “Effective Date” is **13 February 2023**. The “Scheme Record Date” is anticipated to be **15 February 2023**.

9. Further information

The Court has ordered that the information about the final rate of redemption from the Lionheart SPAC and any further supplementary report from Nexia Australia be published in the manner described in section 3 above.

As explained in that section, that information and any further supplementary expert report by Nexia Australia WILL NOT be sent to you. Rather, you will need to obtain the information and the report from SMX’s website or from the ASX announcement page – details of which are set out in section 3 above.

If you require further information after reading this supplementary disclosure document in its entirety, please either call SMX on +972 8 630 6336 (ISR), send an email to info@securitymattersltd.com or visit SMX's website at www.smx.tech.

On behalf of the SMX Board, I thank you for your ongoing support, and I look forward to your participation at the relevant Scheme Meeting.

Yours faithfully,

FINANCIAL SERVICES GUIDE

Dated: 22 January 2023

What is a Financial Services Guide ("FSG")?

This FSG is designed to help you decide whether to use any of the general financial product advice provided by Nexia Sydney Corporate Advisory Pty Ltd ABN 68 114 696 945 ("NSCA"), a corporate authorised representative of Nexia Sydney Financial Solutions Pty Ltd ("NSFS"), Australian Financial Services Licence Number 247300 ("AFSL").

This FSG includes information about:

- NSCA and how they can be contacted
- the services NSCA is authorised to provide
- how NSCA are paid
- any relevant associations or relationships of NSCA
- how complaints are dealt with as well as information about internal and external dispute resolution systems, and how you can access them; and
- the compensation arrangements that NSCA has in place.

Where you have engaged NSCA we act on your behalf when providing financial services. Where you have not engaged NSCA, NSCA acts on behalf of our client when providing these financial services and are required to provide you with a FSG because you receive a report or other financial services from NSCA.

Financial Services that NSCA is authorised to provide

NSCA is a corporate authorised representative of NSFS, which holds an AFSL authorising it to provide, amongst other services, financial product advice for securities and interests in managed investment schemes, including investor directed portfolio services, to retail clients.

We provide financial product advice when engaged to prepare a report in relation to a transaction relating to one of these types of financial products.

NSCA's responsibility to you

NSCA has been engaged by the independent directors of Security Matters Limited ("SMX" or the "Client") to provide general financial product advice in the form of an independent expert's report to be included in the Supplementary Scheme Booklet ("Document") sent to SMX's shareholders dated on or about 22 January 2023 ("Supplementary Report").

You have not engaged NSCA directly but have received a copy of the Supplementary Report because you have been provided with a copy of the Document. NSCA or the employees of NSCA are not acting for any person other than the Client.

NSCA is responsible and accountable to you for ensuring that there is a reasonable basis for the conclusions in the Supplementary Report.

General Advice

As NSCA has been engaged by the Client, the Supplementary Report only contains general advice as it has been prepared without taking into account your personal objectives, financial situation or needs.

You should consider the appropriateness of the general advice in the Supplementary Report having regard to your circumstances before you act on the general advice contained in the Supplementary Report.

You should also consider the other parts of the Document before making any decision in relation to the Scheme.

Fees NSCA may receive

NSCA charges fees for preparing Reports. These fees will usually be agreed with and paid by the Client. Fees are agreed on either a fixed fee or a time cost basis. In this instance, the Client has agreed to pay NSCA \$25,000 (excluding GST and out of pocket expenses) for preparing the Supplementary Report. NSCA and its officers, representatives, related entities and associates will not receive any other fee or benefit in connection with the provision of this Supplementary Report.

Referrals

NSCA does not pay commissions or provide any other benefits to any person for referring clients to them in connection with a Supplementary Report.

Associations and Relationships

Through a variety of corporate and trust structures NSCA is controlled by and operates as part of the Nexia Sydney Group Pty Ltd. NSCA's directors and authorised representative may be directors in the Nexia Sydney Group Pty Ltd group entities ("Nexia Sydney Group"). Mr Brent Goldman, authorised representative of NSFS and director of Nexia Sydney Group Pty Ltd, has prepared this Supplementary Report. The financial product advice in the Supplementary Report is provided by NSCA and not by the Nexia Sydney Group.

From time to time NSCA, the Nexia Sydney Group and related entities ("Nexia entities") may provide professional services, including audit, tax and financial advisory services, to companies and issuers of financial products in the ordinary course of their businesses.

Over the past two years \$58,000 in professional fees have been received from the Client in relation to the Independent Expert's Report.

No individual involved in the preparation of this Supplementary Report holds a substantial interest in, or is a substantial creditor of, the Client or has other material financial interests in the Schemes.

Complaints Resolution

If you have a complaint, please let NSFS know. Formal complaints should be sent in writing to:

Nexia Sydney Financial Solutions Pty Ltd
Head of Compliance
PO Box H195
Australia Square NSW 1215

If you have difficulty in putting your complaint in writing, please telephone the Complaints Officer, Craig Wilford, on +61 2 9251 4600 and he will assist you in documenting your complaint.

Written complaints are recorded, acknowledged within 5 days and investigated. As soon as practical, and not more than 45 days after receiving the written complaint, the response to your complaint will be advised in writing.

External Complaints Resolution Process

If NSFS cannot resolve your complaint to your satisfaction within 45 days, you can refer the matter to the Australian Financial Complaints Authority ("AFCA"). AFCA is an independent company that has been established to provide free advice and assistance to consumers to help in resolving complaints relating to the financial services industry.

Further details about AFCA are available at the AFCA website www.afca.org.au or by contacting them directly at:

Level 25
525 Collins Street
Melbourne VIC 3000

Dear Independent Directors,

Supplementary Independent Expert's Report on schemes of arrangement

1. OUTLINE OF THE SCHEMES

On 26 July 2022, Security Matters Limited ("SMX" or the "Group") announced that it had entered into a scheme implementation deed with Empatán PLC ("Empatán" or "Parent") and Lionheart III Corp ("Lionheart") (together the "Combined Group"). The parties entered into a deed of variation to the scheme implementation deed on 8 January 2023.

Empatán is a newly incorporated Irish entity established to be the holding company of the Combined Group following the implementation of the Scheme. Lionheart is a special purpose acquisition company ("SPAC") listed on the NASDAQ stock exchange in the US.

On completion of the transaction, SMX shareholders will hold shares in Empatán, which will be listed on NASDAQ. The transaction is to be implemented through a scheme of arrangement to acquire all of SMX's ordinary shares (the "Share Scheme") and a separate scheme of arrangement in relation to the exercise of certain options held over shares in SMX (the "Option Scheme") (together the "Schemes").

Under the Share Scheme SMX shareholders immediately prior to the implementation of the Scheme will receive 16,198,372 shares in Empatán in return for 100% of the issued share capital of SMX. The Share Scheme is conditional on a number of matters including:

- court approval;
- SMX and Lionheart shareholder approval;
- NASDAQ quotation for the Parent being obtained;
- Parent having net tangible assets of US\$5 million following implementation of the Share Scheme;
- Option Scheme being implemented;
- Certain SMX employee, founder and service provider option holders agreeing to cancel their options in return for the issue of new options in the Parent;
- SMX performance option holders agreeing to the cancellation of their options, which has been agreed subject to implementation of the Schemes; and
- SMX convertible note holders satisfying the amount owed through the issue of shares in SMX prior to the implementation of the Share Scheme, which has been agreed subject to implementation of the Schemes.

Under the Option Scheme eligible option holders will receive 24,480,008 SMX shares and then participate in the Share Scheme. The Option Scheme is conditional on a number of matters including:

- eligible SMX option holder approval;
- court approval; and
- the Share Scheme becoming effective.

In respect of the Schemes the following will also occur:

- An equity raising is being undertaken at US\$10 a share (with potentially attached warrants) with the intention of raising US\$25 million. There is no minimum fundraising and the Schemes are not conditional on the equity raising.
- On implementation of the Scheme the board of the Parent will comprise seven directors of which Lionheart will appoint three directors (including two independent directors) and SMX will appoint four directors.
- Empatan will change its name to SMX Public Company Limited.
- Transaction costs of US\$11 million are expected to be incurred.
- If the Schemes do not proceed then in certain circumstances a break-fee of US\$2 million may be payable by either SMX or Lionheart.

2. PURPOSE OF AND BASIS FOR SUPPLEMENTARY REPORT

The purpose of this Supplementary Report is to advise the shareholders of SMX on the fairness and reasonableness of the Scheme and whether or not it is in the best interests of the shareholders.

This report has been prepared in accordance with Section 411 of the Corporations Act (Cth) ("Corporations Act") and guidance provided by the Australian Securities and Investments Commission ("ASIC").

ASIC has issued Regulatory Guide 111 *Content of Expert Reports* ("RG111"), which outlines the principles and matters to be considered in an independent expert's report. We have had regard to the guidance relevant to a scheme of arrangement in preparing our report.

The courts require that documentation provided to shareholders is accompanied by an independent expert report. As such, the Directors of SMX have commissioned an independent expert report in respect of the Scheme in order to inform the shareholders as to whether the Scheme is fair and reasonable and in the best interests of the shareholders of SMX.

We previously prepared a report dated 7 October 2022 that was provided to shareholders along with the Scheme Booklet on 9 January 2023. As noted in the Scheme Booklet this report had not been updated since 7 October 2022.

Since that date the following material changes have occurred and are reflected in our analysis of the Scheme:

- changes in the capital structure disclosed in the Scheme Booklet dated 9 January 2023, primarily around the expiry of options subject to the Option Scheme and the issue of new employee, founder and service provider options; and
- SMX entered into additional bridging loan facilities with a number of private investors.

Accordingly, this Supplementary Report supersedes and replaces our Report of 7 October 2022.

3. SUMMARY AND OPINION ON SHARE SCHEME

This section is a summary of our opinion and cannot substitute for a complete reading of this Supplementary Report. Our opinion is based solely on information available as at the date of this Supplementary Report.

The principal factors that we have considered in forming our opinion are summarised below.

3.1.1 Fairness of the Share Scheme

As discussed in section 5, in determining whether the Share Scheme is fair to SMX shareholders, we have compared the fair value of a share on a control basis before the implementation of the Share Scheme to the fair value of the share in Empatán on a minority basis following the implementation of the Share Scheme. This is summarised below:

	Low	Preferred	High
Fair value of a share in SMX on a control basis	A\$0.17	A\$0.23	A\$0.29
Exchange ratio	10.3624	10.3624	10.3624
Fair value of shares in SMX on a control basis for each Empatán share	A\$1.81	A\$2.37	A\$2.96
Fair value of a share in Empatán on a minority basis	A\$3.26	A\$5.07	A\$6.43

The fair value of shares on a minority basis that SMX shareholders will hold in Empatán after the implementation of the Share Scheme is greater than the fair value of a share held in SMX on a control basis applying the exchange ratio.

Therefore, **we have concluded that the Share Scheme is fair.**

A significant assumption in our assessment of fairness is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the shareholder meeting to approve the Share Scheme. Should redemptions be higher than 85% then our approach to the assessment of the fairness of the Share Scheme may change and this may affect our opinion on the fairness of the Share Scheme. In the event that redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

3.1.2 Reasonableness of the Share Scheme

In accordance with RG 111, a transaction is reasonable if:

- the transaction is fair; or
- despite not being fair, but considering other significant factors, shareholders should obtain an overall benefit if the transaction proceeds.

In forming our opinion we have considered the following relevant factors (see section 9.2).

Advantages	Disadvantages
<ul style="list-style-type: none"> • The Share Scheme is fair • Access to capital to continue to develop SMX's technology through to commercialisation. • Listing on the NASDAQ exchange providing a deeper capital pool for further fundraising. • Potential for future liquidity in shares as a result of being listed on a larger exchange 	<ul style="list-style-type: none"> • The level of redemptions is unknown and therefore the level of capital available to the ongoing operations may be insufficient. • Dilution of ownership through the issue of shares to Lionheart shareholders. • SMX Shareholders will hold a security in a foreign entity and on a foreign exchange following implementation of the Share Scheme

The Directors have advised us that there are currently no alternatives to the Share Scheme other than the status quo.

If the Share Scheme is not approved, SMX is likely to need further funding to support its ongoing operations and development activities. Any subsequent fundraising may be dilutive to shareholders.

Depending the circumstances of the Share Scheme not proceeding SMX may be either required to pay or may receive a break fee of US\$2 million.

As the Share Scheme is fair, and taking into consideration the matters above, **we have concluded that the Share Scheme is reasonable.**

A significant assumption in our assessment of reasonableness is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the shareholder meeting to approve the Share Scheme. Should redemptions be higher than 85% then our approach to the assessment of the reasonableness of the Share Scheme may change and this may affect our opinion on the reasonableness of the Share Scheme. In the event that redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

3.2 Opinion on Share Scheme

Accordingly, in our opinion, **the Share Scheme is fair and reasonable and in the best interests of the SMX shareholders.**

A significant assumption in our assessment the Share Scheme is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the shareholder

meeting to approve the Share Scheme. Should redemptions be higher than 85% then our approach to the assessment of the fairness and reasonableness of the Share Scheme may change and this may affect our opinion on the fairness and reasonableness of the Share Scheme and whether or not it is in the shareholders' best interests. In the event that redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

The ultimate decision on whether to approve the Share Scheme should be based on shareholders' own assessment of their circumstances. We strongly recommend that shareholders consult their own professional advisers, carefully read all relevant documentation provided, including the Scheme Booklet, and consider their own specific circumstances before voting in favour of or against the Share Scheme.

4. SUMMARY AND OPINION ON OPTION SCHEME

This section is a summary of our opinion and cannot substitute for a complete reading of this Supplementary Report. Our opinion is based solely on information available as at the date of this Supplementary Report.

The principal factors that we have considered in forming our opinion are summarised below.

4.1.1 Fairness of the Option Scheme

As noted in section 5 in determining the fairness of the Option Scheme we have compared the fair value of a relevant SMX option on a control basis before the implementation of the Schemes to the fair value of the shares optionholders will hold in Empatan on a minority basis after the implementation of the Schemes.

We have undertaken the comparison for each option subject to Option Scheme and the comparison by option is set out in section 10.1.1.

The fair value of Empatan shares on a minority basis held for each option is higher than the fair value of each option subject to the Option Scheme on a control basis prior to the implementation of the Schemes. Therefore, **we have concluded that the Option Scheme is fair.**

A significant assumption in our assessment of fairness is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the optionholder meeting to approve the Option Scheme. Should redemptions be higher than 85% then our approach to the assessment of the fairness of the Option Scheme may change and this may affect our opinion on the fairness of the Option Scheme. In the event that redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

4.1.2 Assessment of reasonableness of the Option Scheme

In considering the reasonableness of the Option Scheme the advantages and disadvantages as set out for the Share Scheme along with the alternatives to the transaction are also applicable.

The Option Scheme has the additional advantage for the SMX optionholders in that they receive shares in SMX and ultimately in Empatan without having to pay for the exercise of the options.

In accordance with RG 111, a transaction is reasonable if:

- the transaction is fair; or
- despite not being fair, but considering other significant factors, shareholders should obtain an overall benefit if the transaction proceeds.

As the Option Scheme is fair and, taking into account other significant factors, **we have concluded that the Option Scheme is reasonable.**

A significant assumption in our assessment of reasonableness is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the optionholder meeting to approve the Option Scheme. Should redemptions be higher than 85% then our approach to the assessment of the reasonableness of the Option Scheme may change and this may affect our opinion on the reasonableness of the Share Scheme. In the event that redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

4.1.3 Opinion on Option Scheme

Accordingly, in our opinion, **the Option Scheme is fair and reasonable and in the best interests** of the SMX optionholders.

A significant assumption in our assessment the Option Scheme is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the optionholder meeting to approve the Option Scheme. Should redemptions be higher than 85% then our approach to the assessment of the fairness and reasonableness of the Option Scheme may change and this may affect our opinion on the fairness and reasonableness of the Option Scheme and whether or not it is in the optionholders' best interest. In the event that redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

The ultimate decision on whether to approve the Option Scheme should be based on optionholders' own assessment of their circumstances. We strongly recommend that optionholders consult their own professional advisers, carefully read all relevant documentation provided, including the Scheme Booklet, and consider their own specific circumstances before voting in favour of or against the Option Scheme.

Yours faithfully

STRUCTURE OF REPORT

Our Supplementary Report is set out under the following headings:

5. BASIS OF EVALUATION	8
6. OVERVIEW OF SMX	10
7. OVERVIEW OF LIONHEART	20
8. VALUATION METHODOLOGIES	25
9. ASSESSMENT OF SHARE SCHEME	26
10. ASSESSMENT OF OPTION SCHEME	35

APPENDICES

APPENDIX A – GLOSSARY	39
APPENDIX B - SOURCES OF INFORMATION	40
APPENDIX C - STATEMENT OF DECLARATION & QUALIFICATIONS	41
APPENDIX D - VALUATION METHODOLOGIES	43

5. BASIS OF EVALUATION

RG 111 provides guidance as to matters that should be considered in determining whether a transaction is fair and reasonable in a range of circumstances.

RG 111 state that in deciding an appropriate form of analysis, the expert needs to consider that the main purpose of the report is to deal with the concerns that could reasonably be anticipated by those persons affected by the transaction. An expert should focus on the purpose and outcome of the transaction; that is the substance of the transaction, rather than the legal mechanism used to effect the transaction.

RG 111 requires analysis of a transaction under two distinct criteria being:

- is the offer 'fair'?; and
- is it reasonable?

That is the opinion of fair and reasonable is not considered as a compound phrase.

In determining what is fair and reasonable for a control transaction, RG 111 states that:

- an offer is fair if the value of the offer price or consideration is equal to or greater than the value of the securities the subject of the offer, assuming a 100% interest in the target and irrespective of whether consideration is cash or scrip; and
- an offer is reasonable if it is fair, or if the offer is not fair, the expert believes that there are sufficient reasons for security holders to accept the offer in the absence of a higher bid before the close of an offer.

In determining whether the transaction is fair, the fair value is assumed to be based on a knowledgeable and willing, but not anxious, buyer and a knowledgeable and willing, but not anxious, seller acting at arm's length.

RG 111 states that if an expert concluded that a transaction is 'fair and reasonable' in the form of a takeover bid, an expert would also be able to conclude that the scheme is in the best interests of the shareholders.

If an expert concludes that a transaction is 'not fair but reasonable' then an expert may still determine that a transaction is in the best interests of the shareholders with the expert clearly stating that consideration is not equal to or greater than the value of the securities the subject of the scheme but that there are sufficient reasons for security holders to vote in favour of the scheme in the absence of a higher offer.

If an expert concludes that a scheme is 'not fair and not reasonable' then the expert would conclude that the scheme was not in the best interests of shareholders.

For the purpose of considering whether or not the Share Scheme is fair, we have compared the fair value of a share in SMX on a control basis prior to the Share Scheme to the fair value of the consideration shares held in Empatán on a minority basis after the implementation of the Share Scheme. The fairness of the Share Scheme has been assessed on this basis given that following implementation of the Share Scheme SMX shareholders will hold a minority interest in Empatán.

For the purposes of considering whether or not the Option Scheme is fair, we have compared the fair value of the options held in SMX on a control basis to the fair value of shares on a minority basis that SMX optionholders will hold in Empatán following the implementation of the Option Scheme and Share Scheme. The fairness of the Option Scheme has been assessed on this basis as the SMX options holders will hold a minority interest in Empatán following the implementation of the Schemes both of which are conditional on each other.

In our assessment of the reasonableness of the Scheme, our consideration has included the following matters:

- the bidder's pre-existing voting power in securities in SMX;
- other significant security holding blocks in SMX;
- the liquidity of the market in SMX's securities;
- taxation losses, cash flow or other benefits through achieving 100% ownership of SMX;
- any special value to the bidder, such as technology, the potential to write-off outstanding loans from SMX, etc;
- the likely market price if the Schemes are not successful;
- the value to an alternate bidder and the likelihood of an alternative bid being made; and
- other significant matters set out in sections 9.2 and 10.2.

5.1 Individual security holders' circumstances

The ultimate decision whether to approve the Schemes should be based on each security holder's assessment of the Schemes, including their own risk profile, liquidity preference, tax position and expectations as to value and future market conditions. If in doubt about the Schemes or matters dealt with in this Supplementary Report, security holders should seek independent professional advice.

5.2 Limitations on reliance on information

The documents and information relied on for the purposes of this Supplementary Report are set out in Appendix B. We have considered and relied upon this information and believe that the information provided is reliable, complete and not misleading and we have no reason to believe that documents and material facts have been withheld. The information provided was evaluated through analysis, enquiry and review for the purpose of forming an opinion as to whether the Schemes are fair and reasonable and in the best interests of the shareholders. However, we do not warrant that our enquiries have identified or verified all of the matters which an audit or extensive examination might disclose.

We understand the accounting and other financial information that was provided to us has been prepared in accordance with generally accepted accounting principles. SMX prepares its financial statements in accordance with Australian Accounting Standards and Lionheart prepares its financial statements in accordance with US Generally Accepted Accounting Standards.

An important part of the information used in forming an opinion of the kind expressed in this Supplementary Report is the opinions and judgement of Directors and management. This type of information has also been evaluated through analysis, enquiry and review to the extent practical. However, it must be recognised that such information is not always capable of external verification or validation.

NSCA are not the auditors of SMX or Lionheart. We have analysed and reviewed information provided by the Directors and management of SMX and Lionheart and made further enquiries where appropriate. Preparation of this Supplementary Report does not imply that we have in any way audited the accounts or records of SMX or Lionheart.

In forming our opinion we have assumed:

- matters such as title, compliance with laws and regulations and contracts in place are in good standing and will remain so and that there are no material legal proceedings, other than as publicly disclosed;
- the information set out in the Scheme Booklet to be sent to security holders is complete, accurate and fairly represented in all material respects; and
- the publicly available information relied upon by NSCA in its analysis was accurate and not misleading.

This Supplementary Report has been prepared after taking into consideration the current economic and market climate. We take no responsibility for events occurring after the date of this Supplementary Report which may impact upon this Supplementary Report or which may impact upon the assumptions referred to in the Supplementary Report.

6. OVERVIEW OF SMX

6.1 Background

SMX is involved in the development and commercialisation of trace and track technology for a wide range of industries. The Group commenced operations in Israel in 2015 when it entered into a licensing agreement with an Israeli Government state owned enterprise to license and further develop the underlying technology for “reading” materials for commercial application. On 11 October 2018, SMX listed on the Australian Securities Exchange (“ASX”).

The SMX group comprises the following entities held either directly or indirectly:

Entity	% interest
Security Matters France (French business number 900404104)	100%
Security Matters Canada (British Columbia Canada number BC1294203)	100%
Security Matters Ltd. (Israeli company 51-512577-1)	100%
SMX Beverages Pty Ltd (ACN 637 440 272)	100%
Yahaloma Technologies Inc. (British Columbia Canada number BC1219747)	50%
True Gold Consortium Pty Ltd (ACN 641 483 374)	44.8%

6.2 Operations

SMX is yet to generate revenue and its primary operations relate to research and development activities in relation to the commercial application of the mark, track and trace technology. As part of the development, SMX is working with industry participants through joint ventures and commercial operating agreements to develop the technology in specific industries.

SMX’s technology can be applied to any material. It stores data at a molecular level on solids, gases and liquids and can be applied at any point in the supply chain as a drop-in solution. The technology allows materials and products to be:

- marked and recorded using blockchain technology to enable accurate identification;
- protected from product diversion, counterfeiting and fraud;
- fully traced to origin and through their supply chain history;

- compliant with ESG regulations, international customs and industry quality regulations (including food regulations); and
- authenticated in real-time.

SMX is currently undertaking, inter alia, the following industry projects:

- Commercialisation of the technology in the alcoholic beverages industry.
- Through Yahaloma Technologies Inc, a joint venture with Canadian company, Trifecta Industries Inc, SMX is working on the commercialisation of the technology in the diamonds and precious stones industry.
- Through True Gold Consortium Pty Ltd, of which W.A. Mint Pty Ltd, subsidiary of the Perth Mint is the other main partner, SMX is working to create an industry standard to mark, track and trace gold bars and gold through every stage of the supply chain using blockchain technology.
- Development of the Fashion Sustainability Competence Centre to provide participating fashion brands access to SMX's technology. The aim is to allow participating brands to recycle their own merchandise back into high-quality material and merchandise at a commercial scale.
- Joint operation to develop solutions for plastic traceability and circularity.
- Commercialisation of the technology for ethical sourcing of natural and synthetic rubber.

Further information about SMX and its operations is set out in section 5 of the Scheme Booklet.

6.3 Directors

The current board directors of SMX are set out below:

Name	Role	Appointment
Everardus Hofland	Executive Chairman	24 July 2018
Jovanka Naumoska	Non-Executive Director	24 July 2018
Amir Bader	Non-Executive Director	24 July 2018

Notes:

- Trade receivables at 30 June 2022 relate to amounts receivable from industry partners for pilot projects.
- Other receivables include amounts receivable from tax authorities in relation to valued added tax receivable and tax advance in relation to employees that will be deductible from future tax payments, proof of concept receivables and prepaid expenses. The increase in prepayments at 30 June 2022 relates to the prepaid transaction costs in relation to the Schemes.
- Property and equipment primarily relates to machines and equipment and right of use assets for leases.
- Intangible assets relate to patents, marking and reading technology and software and blockchain assets. Expenditure has been capitalised across all areas over the last three years. The increase at 30 June 2022 also includes exclusive licence intellectual property acquired (US\$664,000) as a result of a 50% acquisition of SMX Beverages Pty Ltd for which consideration was paid through the issue of options.

5. Investments in joint ventures relate to the joint operations set out in section 6.1. These operations are accounted for using the equity method of accounting whereby investments are recorded at cost and movements in the share of net assets are reflected in the carrying value.
6. Lease liabilities relate to the accounting for right of use assets.
7. Other payables primarily relates to amounts payable to employees and related liabilities (HY22: US\$549,000). The balance at HY22 also includes:
 - Liabilities for grants received of US\$20,000 (with a further US\$105,000 recognised as a non-current liability, a total of US\$125,000).
 - US\$24,000 are payable to Kibbutz Ketura for administrative services.
8. Convertibles notes were issued in May 2022 and are discussed further in section 6.5.5.
9. Borrowings from related parties are loans from two shareholders, Kibbutz Ketura ACS and Kibbutz Degania A. The loans are back-to-back loans from a third-party lender, Kamea Fund, which the shareholders on-lent to SMX on the same terms. In respect of the loans:
 - Interest is payable on the loans at 4% per annum.
 - The loans were fully repaid in August 2022
 - Aggregate bonus payments of US\$0.77 million (ILS 2.5 million) are payable upon completion of the Schemes.
10. The share based payments reserve relates to options granted to employees and other service providers. It also includes options issued for the acquisition of 50% of SMX Beverages Pty Ltd, which are included in the Option Scheme. Any options that expire during a period are reclassified to issued capital.
11. Foreign currency translation reserves relate to foreign exchange gains and losses reflected in equity on the translation of group company financial statements to USD for consolidation.
12. At 31 December 2021, SMX had carried forward tax losses of US\$17,837,000, which have not been booked.
13. Between August 2022 and December 2022, the company entered into loan agreements with a number of private investors raising a total of US\$3,760,000 incurring 10% interest per annum.

The loans have various payment terms and attaching warrants to acquire shares in Empatan all of which have an exercise price of US\$11.50. All warrants have a five year term.

The terms of the loans are summarised below based on repayment terms:

Amount (US\$)	Payment on implementation of the Scheme	Redeemable warrants	Other warrants	Warrant redemption rights
1,710,000	50% repayable on first anniversary and 50% on the second anniversary	342,000	85,500	The investor has the right to redeem 50% of the warrants within 3 months of the implementation of the Schemes for US\$5 each and a further 25% on the 3rd and 4th anniversary
1,100,000	50% repayable on implementation of the Schemes, remainder earlier of 31 July 2023 and six months of implementation of the Schemes	20,000	105,000	The investor has the right to redeem 50% of the warrants on the 1st and 2nd anniversary of the implementation of the Schemes for US\$5

7. OVERVIEW OF LIONHEART

7.1 Background

Lionheart is a US blank cheque company formed for the purpose of identifying and entering into a merger. Lionheart was incorporated on 14 January 2021 and listed on the NASDAQ Stock Exchange on 3 November 2021.

Apart from identifying and evaluating potential transactions, Lionheart has not undertaken any activities to date.

7.2 Directors

The current board directors of Lionheart are set out below:

Name	Role	Appointment
Ophir Sternberg	Chairman and CEO	14 January 2021
James Stephen Anderson	Independent Director	3 November 2021
Thomas Clyde Byrne	Independent Director	3 November 2021
Thomas W. Hawkins	Independent Director	3 November 2021
Roger Meltzer	Independent Director	3 November 2021

Source: S&P Capital IQ

Following implementation of the Schemes, Lionheart has the right to appoint three directors, two of whom are independent directors.

7.3 Financial Information

Lionheart's auditor's report for the period from 14 January 2021 (date of incorporation) to 31 December 2021 was unqualified. An explanatory paragraph was included in regards to going concern, noting that Lionheart's business plan is dependent on completion of a business combination and that Lionheart has determined that mandatory liquidation and subsequent dissolution should the company not complete a business combination raises substantial doubt about Lionheart's ability to continue as a going concern.

Lionheart's interim financial statements for the nine months to 30 September 2022 are unaudited.

Lionheart prepares its financial statements in accordance with US GAAP.

7.3.1 Trading results

Set out below are the audited profit and loss accounts of Lionheart for the period from 14 January 2021 to 31 December 2021 and the unaudited profit and loss account for the nine months ended 30 September 2022:

Notes:

1. Relates to funds held in trust in respect of Class A common stock subject possible redemption.
2. Accrued expenses mainly relate to transaction costs incurred to 30 September 2022.
3. The deferred underwriting fee relates to the underwriters of the IPO and will be become payable to the underwriters from the amounts held in trust only if Lionheart completes a business combination.
4. Under US GAAP, conditionally redeemable stock, including redemption features outside the control of the company, is classified as temporary equity. The amount reflects 12,500,000 shares with a US\$10.10 redemption obligation.
5. Issued for nominal consideration.

7.4 Capital Structure

Lionheart's issued capital at 30 June 2022 comprised:

- 12,500,000 Class A common stock subject to possible redemption
- 3,525,000 Class B common stock
- 6,250,000 public warrants
- 2,200,000 private placement warrants

7.4.1 Class A common stock and Class B common stock

The following shareholders held a voting interest of more than 5% in Lionheart at 7 September 2022:

Shareholder	Quantity held	% ownership
Ophir Sternberg	3,400,000	21.2%
Saba Capital Management LP	1,132,075	7.1%
Significant shareholders	4,532,075	28.3%
Other	11,492,925	71.7%
Total shares	16,025,000	100.0%

Source: Scheme Booklet

Class A common stock and Class B common stock all have the same rights except as follows:

- Class A common stock has the right to redemption of their shares for the amount of funds in the trust account divided by the number of securities with the redemption right. Initially the trust account holds US\$10.10 per redeemable Class A common stock. The redemption right can be exercised on a business combination or after 12 months if a business combination has not occurred or an extension to complete a transaction is not approved.
- Class B common stock has restrictions on transferability. On a business combination the Class B common stock automatically converts to Class A common stock. If the Class A common stock is the same as at the time of listing then this is on a one for one basis. If there has been an increase in Class A Common Stock, then the Class B common stock converts to be 20% of all Class A common stock.

Under the Schemes, Class A and Class B common stockholders will receive one ordinary share in Empatan for each share that they hold.

7.4.2 Public and private placement warrants

The public and private placement warrants have the same terms except that the private warrants have restrictions on transferability.

The key terms of the warrants are:

- exercise price of \$11.50 a share;
- exercisable 30 days after a business combination or 12 months from listing date; and
- expire after 5 years.

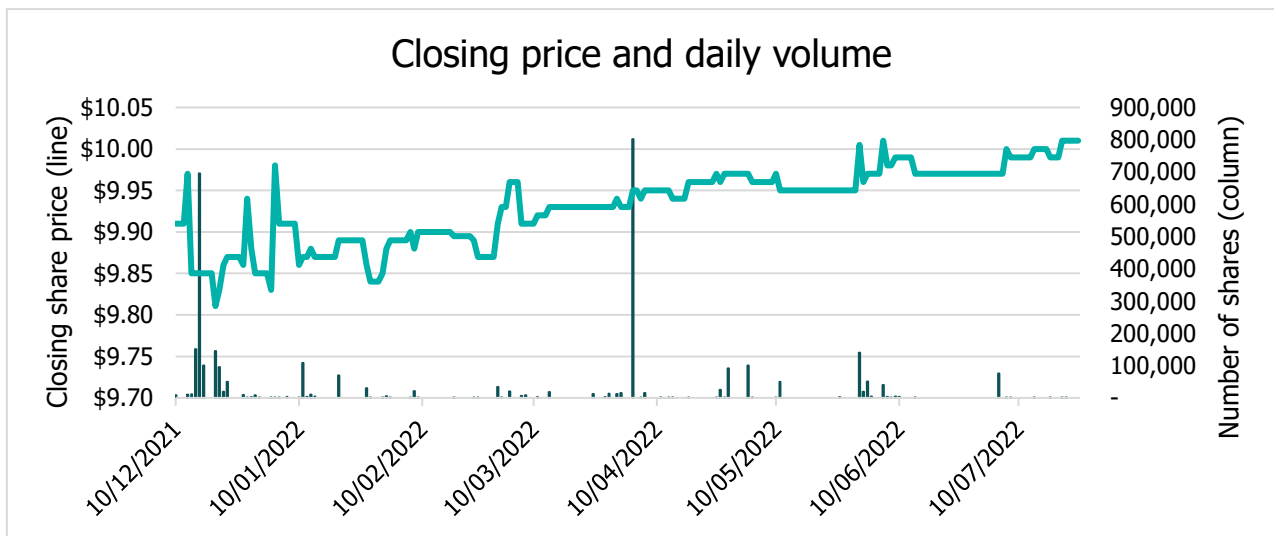

Under the Schemes all Lionheart warrants will be converted to public warrants and holders will receive a warrant in Empatan on the same terms as the warrant held.

7.4.3 Public offer

Under the public offering for the IPO, shares were issued for US\$10 which comprised one Class A share and half a warrant per share.

7.5 Share Price and Volume Trading Analysis

The following chart provides a summary of the trading volumes and prices for Lionheart shares from 9 December 2021 (the first day of trading) to 25 July 2022, the last full day of trading prior to the announcement of the Schemes:

Source: S&P CapitalIQ

The chart above indicates that the closing share price of Lionheart has traded within a range of US\$9.84 and US\$10.01 over the 180 days to 25 July 2022 (the last full day of trading before the announcement of the Schemes) with a closing price of A\$10.01.

Prices and volumes of trading in Lionheart's shares for the last 180 days prior to 25 July 2022 are summarised in the table below.

Period prior to 25 July 2022	Share Price Low	Share Price High	Cumulative volume traded	VWAP
1 Day	US\$10.010	US\$10.010	-	\$ -
30 Days	US\$ 9.970	US\$10.010	77,040	US\$ 9.971

180 Days	US\$ 9.840	US\$10.010	1,637,780	US\$ 9.956

Lionheart's shares have a low level of liquidity, with 14.9% (on an annualised basis) of Lionheart's capital being traded in the last 90 days.

8. VALUATION METHODOLOGIES

8.1 Definition of market value

In forming our opinion as to whether or not the Schemes are fair and reasonable to the SMX Shareholders and SMX Optionholders, we have assessed the value of the issued shares and options of SMX on a fair value basis. RG 111 defines fair value as the amount:

"assuming a knowledgeable and willing, but not anxious, buyer and a knowledgeable and willing, but not anxious, seller acting at arm's length..."

8.2 Selection of Methodology

RG 111 provides guidance on the valuation methods that an independent expert should consider. These methods include:

- the discounted cash flow method and the estimated realisable value of any surplus assets;
- the application of earnings multiples (appropriate to the business or industry in which the entity operates) to the estimated future maintainable earnings or cash flows of the entity, added to the estimated realisable value of any surplus assets;
- the amount that would be available for distribution to security holders on an orderly realisation of assets;
- the quoted price for listed securities, when there is a liquid and active market and allowing for the fact that the quoted price may not reflect their value, should 100% of the securities be available for sale;
- any recent genuine offers received by the target for the entire business, or any business units or assets as a basis for valuation of those business units or assets; and
- the amount that an alternative bidder might be willing to offer if all the securities in the target were available for purchase.

Each methodology is appropriate in certain circumstances. The decision as to which methodology to apply generally depends on the nature of the asset being valued, the methodology most commonly applied in valuing such an asset and the availability of appropriate information.

In determining the fair value of SMX, we have applied the quoted price and recent genuine offers methodologies. We have determined these to be the most appropriate methodologies as:

- SMX is yet to generate revenue as it is commercialising its technology;
- Management has not prepared long-term forecasts on the business through to commercial sales that can be used for a discounted cash flow valuation;
- There has been trading in SMX's shares, albeit a low volume; and
- SMX has issued new equity to investors.

In determining the fair value of Lionheart, we have applied the quoted price and genuine recent offers methodologies. We have determined these to be the most appropriate methodologies as:

- Lionheart's value reflects the cash held and its NASDAQ listing;
- Lionheart's issue price at IPO is a recent genuine offer for Lionheart Shares; and
- There has been in trading Lionheart's shares, albeit a low volume.

In determining the fair value of options held in SMX, we have applied the binomial valuation methodology. We have applied this methodology as options are exercisable at any time up to expiry. The binomial valuation methodology reflects these exercise rights in determining a fair value.

9. ASSESSMENT OF SHARE SCHEME

9.1 Fairness of the Share Scheme

As noted in section 5, in determining the fairness of the Share Scheme we have compared the fair value of a SMX share on a control basis before the implementation of the Schemes to the fair value of a share in Empatan on a minority basis after the implementation of the Schemes.

9.1.1 Fair value of a SMX share before the implementation of the Schemes

We have determined the fair value of a SMX share on a control basis to be as follows:

		Low	Preferred	High
Fair value of SMX share on a minority basis	1	A\$0.15	A\$0.18	A\$0.22
Control premium	2	20%	25%	30%
Fair value of SMX share on a control basis		A\$0.17	A\$0.23	A\$0.29

Notes:

1. The fair value of a share on a minority basis reflects the 90-day VWAP as at 25 July 2022, the last trading day before announcement of the Schemes, at the low end of the valuation range. The high end of the range has been determined based on the issue price for the capital raise in October 2021.
2. A control premium has been applied at 20% to 30% based on long term academic studies which show average control premiums between these ranges. This is also consistent with experience of ASX companies with the average control premium over the last 10 years falling within this range.

9.1.2 Fair value of Empatan after implementation of the Schemes

The fair value of a share in Empatan on a minority basis after the implementation of the Schemes is summarised below.

A\$000		Low	Preferred	High
Fair value of Empatan on a minority basis	1	-	-	-
Fair value of Lionheart on a minority basis	2	228,891	229,128	229,366
Fair value of SMX on a minority basis	3	24,377	30,653	36,928
Aggregated fair value of Combined Group before implementation of the Schemes		253,268	259,781	266,294

Issue of shares under to option holders under the Option Scheme	7	2,362,380	2,362,380	2,362,380
Redemption of Lionheart Class A shares	8	(10,678,020)	(6,750,930)	(2,823,840)
Number of shares after implementation of Schemes		24,004,234	27,931,324	31,858,414
Fair value of a share in Empatan on a minority basis after implementation of the Schemes		A\$3.26	A\$5.07	A\$6.43

Notes:

- Empatan is a newly formed company for the purposes of implementing the Schemes and therefore has no value prior to the implementation of the Schemes.
- The fair value of Lionheart on a minority basis has been determined as follows:

A\$000		Low	Preferred	High
Fair value of a share in Lionheart on a minority basis	(a)	A\$14.28	A\$14.30	A\$14.31
Number of shares	(b)	16,025,000	16,025,000	16,025,000
Fair value of Lionheart on a minority basis		228,891	229,128	229,366

- (a) The fair value of a share in Lionheart is based on the 90-day VWAP as set out in section 7.5 at the low end of the range and the issue price under the public offer of US\$10 at the high end of the range. The share price reflects a minority interest in Lionheart.

Under the public offer, shareholders received half a warrant for every share with an exercise price of US\$11.50 and exercise period of 30 days after a business combination or 12 months from the

public offer. We have valued these warrants as having a value of US\$0 using a Black-Scholes option pricing model. In calculating the warrant valuation we used a risk-free rate of 0.17% based on the US 1-year Treasury Bill rate at 3 November 2021 (the date of listing) and a volatility rate of 2% based on the average 12-month volatility rate of SPACs listed on the NASDAQ.

All amounts have been converted at the rate of A\$1:43:US\$1 based on the exchange rate at 17 January 2023.

- (b) Under the terms of the business combination agreement all Lionheart class A and class B shareholders will be offered 1 ordinary shares in Empatan for each share held. The number of shares reflects the total class A and class B shares as set out in section 7.4 before any redemptions.

3. The fair value of SMX on a minority basis has been determined as follows:

A\$000		Low	Preferred	High
Fair value of a share in SMX on a minority basis	(a)	A\$0.15	A\$0.18	A\$0.22
Number of shares on issue	(b)	167,854,581	167,854,581	167,854,581
Fair value of SMX on a minority basis	(c)	24,377	30,653	36,928

- (a) The fair value of a share on a minority basis for SMX reflects the fair value of a share as set out in section 9.1.1 before the application of a control premium.

- (b) The number of shares on issue in SMX before the implementation of the Schemes as set out in section 6.5.

- (c) The fair value of a share on a minority basis has been presented rounded to two decimal places. As a result, the calculated fair value determined by the multiplication of the presented share price by the number of shares differs due to rounding differences.

4. Under the Schemes, convertible notes in SMX as set out in section 6.5.5 will be converted into shares immediately before the implementation of the Share Scheme, reducing SMX's liabilities and therefore increasing its equity value.
5. Transaction costs of US\$11 million are expected to be incurred in implementing the Schemes. The estimated transaction costs have been converted at the rate of A\$1:43:US\$1 based on the exchange rate at 17 January 2023.
6. As set out in section 6.4.2, on implementation of the Schemes a bonus payment of ILS 2.5 million will be paid in settlement of SMX related party loans. This will reduce the cash balance of Empatan and therefore the equity value. The amount has been converted at the rate of A\$0.43:ILS1 based on the exchange rate at 2 September 2022.

7. Under the terms of the Share Scheme, SMX shareholders immediately prior to implementation of the Schemes, shares to be issued under the Option Scheme and shares that are issuable under employee, founder and service provider options will receive the proportion of their interest in SMX allocated across a total of 20 million Empatan shares.

	Low	Preferred	High
Shareholders prior to implementation of the Schemes	167,854,581	167,854,581	167,854,581
Convertible noteholders	1,000,000	1,000,000	1,000,000
Shares issued under Option Scheme	24,480,008	24,480,008	24,480,008
Shares allocated to employee, founder and service provider optionholders	13,914,114	13,914,114	13,914,114
Number of SMX shares before implementation of Schemes	207,248,703	207,248,703	207,248,703
Shareholders prior to implementation of the Schemes	16,198,372	16,198,372	16,198,372
Convertible noteholders	96,502	96,502	96,502
Shares issued under Option Scheme	2,362,380	2,362,380	2,362,380
Shares allocated to employee, founder and service provider optionholders	1,342,746	1,342,746	1,342,746
Number of shares SMX shareholders hold in Empatan after the implementation of the Schemes	20,000,000	20,000,000	20,000,000
Exchange ratio	10.3624	10.3624	10.3624

8. As set out in section 7.4.1, Lionheart has on issue 12,500,000 class A shares which have redemption rights on a business combination. The initial redemption value established by funds held in trust is US\$10.10. The redemption adjustment is calculated as follows:

A\$000	Low	Preferred	High
Class A shares in Lionheart subject to redemption	12,500,000	12,500,000	12,500,000
Redemption rate assumed	85%	54%	23%
Number of shares redeemed	10,678,020	6,750,930	2,823,840
Amount per class A share redeemed	A\$14.46	A\$14.46	A\$14.46
Assumed redemption amount	154,363	97,592	40,822

We have analysed the redemption rates of NASDAQ listed SPACs that completed a reverse merger such as proposed under the Schemes since January 2022, where publicly available information was available, to determine the redemption rates in those transactions. These are summarised in the table below:

Completion date	SPAC	Buyer	Transaction value (US\$m)	Redemption rate
13/01/2022	Decarbonization Plus Acquisition Corporation II (De-SPAC)	Tritium DCFC Limited (NASDAQM:DCFC)	1,159	32%

Source: S&P Capital IQ and Nexia analysis

There is a significant range in redemptions on completed SPAC transactions identified from 98% as a maximum to a minimum of 9%. In our analysis we have applied the mean of identified transactions as the mean redemption assumption. The high and low range is based on approximately one standard deviation of the transactions identified.

The redemption amount of US\$10.10 has been converted at the rate of A\$1:43:US\$1 based on the exchange rate at 17 January 2023.

9. As set out in section 6.4.2, SMX entered into loans with private investors raising US\$3,760,000 with 790,000 attaching warrants.

A number of the loans are either partially or fully repayable with interest on implementation of the Schemes. The adjustment reflects the amount payable on implementation of the Schemes and has been converted at the rate of A\$1:43:US\$1 based on the exchange rate at 17 January 2023.

The warrants have a term of five years and an exercise price of US\$11.50. Of the 790,000 warrants, 552,000 warrants allow the investor the right to redeem a warrant for US\$5 each at various periods. For these warrants we have determined the fair value of a warrant granted in Empatán to be the maximum of the fair value of a warrant determined based on the binomial valuation methodology and the redemption amount of US\$5 a warrant. In determining the fair value of a warrants we have assumed:

- fair value of a share in Empatán to be that after the implementation of the Scheme but before the warrants;
- risk free rate of 3.3% based on the Australian Government 5-year debt rate; and

- Volatility of 66% based on SMX's 2-year share price volatility rate.

At the low, preferred and high range the redemption rate of US\$5 a warrant where is applicable is higher than the fair value of a warrant calculated under the binomial valuation methodology. Therefore, the redemption rate for these warrants has been determined to be the fair value of a warrant.

9.1.3 Conclusion on fairness of Share Scheme

As discussed in section 5, in determining whether the Share Scheme is fair to SMX shareholders, we have compared the fair value of a share on a control basis before the implementation of the Share Scheme to the fair value of the share in Empatan on a minority basis following the implementation of the Share Scheme. This is summarised below:

	Low	Preferred	High
Fair value of a share in SMX on a control basis	A\$0.17	A\$0.23	A\$0.29
Exchange ratio	10.3624	10.3624	10.3624
Fair value of shares in SMX on a control basis for each Empatan share	A\$1.81	A\$2.37	A\$2.96
Fair value of a share in Empatan on a minority basis	A\$3.26	A\$5.07	A\$6.43

The fair value of shares on a minority basis that SMX shareholders will hold in Empatan after the implementation of the Share Scheme is greater than the fair value of a share held in SMX on a control basis applying the exchange ratio.

Therefore, **we have concluded that the Share Scheme is fair.**

A significant assumption in our assessment of fairness is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the shareholder meeting to approve the Share Scheme. Should redemptions be higher than 85% then our approach to the assessment of the fairness of the Share Scheme may change and this may affect our opinion on the fairness of the Share Scheme. In the event that redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

9.2 Reasonableness of the Share Scheme

9.2.1 Approach to assessing Reasonableness

In forming our conclusions in this Supplementary Report, we have compared the advantages and disadvantages to shareholders if the Share Scheme proceeds.

9.2.2 Advantages of the Share Scheme

We outline below potential advantages of the Share Scheme:

Advantage	Explanation
The Share Scheme is fair	As noted in section 9.1.3, the Share Scheme is fair.

Advantage	Explanation
<p>Access to capital to continue to develop SMX’s technology through to commercialisation.</p>	<p>Following the implementation of the Share Scheme, SMX will have access to funding from the unredeemed Class A shares in Lionheart as well as the potential fundraising.</p> <p>The Share Scheme is not conditional on the fund raising and the level of funding is currently uncertain. The fundraising is taking place at US\$10 a share and potentially associated warrants. Although the final terms are not finalised, as the fundraising is intended to be at a price above the fair value we have determined for Empatan after the implementation of the Share Scheme, this will not dilute the fair value of Empatan’s shares.</p> <p>The additional funding will provide greater opportunity for SMX to develop its technology to commercialisation and increase value for SMX shareholders in the future.</p>
<p>Listing on the NASDAQ exchange providing a deeper capital pool for further fundraising.</p>	<p>The NASDAQ market is a larger market than the ASX on which SMX is currently listed. As a result, there are more potential investors that may be approached for future investment in Empatan and therefore more funding available to further develop SMX’s technology.</p> <p>NASDAQ has a reputation for attracting investment in technology companies and exposure to this investor market may also increase funding sources and opportunities.</p>
<p>Potential for future liquidity in shares as a result of being listed on a larger exchange</p>	<p>The exposure to a larger market and investors with a stronger interest in earlier stage technology companies such as SMX may increase demand for shares in Empatan and therefore increase the volume of trading in Empatan’s shares improving the opportunity for SMX shareholders to realise their investment.</p>

9.2.3 Disadvantages of the Share Scheme

We outline following the potential disadvantages of the Share Scheme:

Disadvantage	Explanation
<p>The level of redemptions is unknown and therefore the level of capital available to the ongoing operations may be insufficient.</p>	<p>There is no minimum level of funds that are required within Lionheart to implement the Share Scheme. The actual level of redemptions will not be known until after Lionheart’s shareholders have voted on the Share Scheme.</p> <p>A higher redemption rate will also impact the amount of funding available to further develop SMX’s technology and may require further fundraising activity to be undertaken in the short term.</p>

Disadvantage	Explanation
Dilution of ownership through the issue of shares to Lionheart shareholders.	<p>Following the implementation of the Scheme, SMX shareholders' interest in the underlying operations will reduce.</p> <p>The level of ongoing ownership that SMX shareholders will have will be dependent on the level of Lionheart shareholders that exercise their redemption rights and the level of funding drawn down under the standby equity facility.</p> <p>Based on the redemption assumptions we have applied in our determination of the fair value of Empatan after the implementation of the Share Scheme of 85% at the low end of the range to 23% at the higher end of the range then SMX Shareholders will retain an interest of 67% to 48%, respectively.</p>
SMX Shareholders will hold a security in a foreign entity and on a foreign exchange following implementation of the Share Scheme	<p>Following the implementation of the Share Scheme, SMX shareholders will hold shares in an Irish company and shares will be traded on the NASDAQ exchange.</p> <p>There may be implications for holding shares in a foreign company for individual shareholders as well as unfamiliarity with local practices, as opposed to those in Australia, governing corporations.</p> <p>SMX shareholders may be unfamiliar with the trading practices on NASDAQ compared to the ASX, which may impact on the decision to own shares in Empatan following the implementation of the Share Scheme.</p>

9.2.4 Other considerations

The tax implications of the Share Scheme for Australian shareholders are set out in Part A of Annexure A of the Scheme Booklet. The general advice notes that Australian SMX shareholders should be able to obtain capital gains tax roll-over relief and therefore, suffer no adverse tax consequence from the implementation of the Share Scheme. Individual SMX shareholders should seek their own independent tax advice.

9.2.5 Alternatives to the transaction

The Directors have advised us that there are currently no alternatives to the Share Scheme, other than the status quo.

9.2.6 Implications of the transaction not proceeding

If the Share Scheme is not approved, SMX is likely to need further funding to support its ongoing operations and development activities. Any subsequent fundraising may be dilutive to shareholders.

Depending on the circumstances of the Share Scheme not proceeding, SMX may be either required to pay or may receive a break fee of US\$2 million.

9.2.7 Conclusion as to Reasonableness

In accordance with RG 111, a transaction is reasonable if:

- the transaction is fair; or
- despite not being fair, but considering other significant factors, shareholders should obtain an overall benefit if the transaction proceeds.

As the Share Scheme is fair and, taking into account other significant factors, **we have concluded that the Share Scheme is reasonable.**

A significant assumption in our assessment of reasonableness is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the shareholder meeting to approve the Share Scheme. Should redemptions be higher than 85% then our approach to the assessment of the reasonableness of the Share Scheme may change and this may affect our opinion on the reasonableness of the Share Scheme. In the event that redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

9.3 **Opinion on Share Scheme**

Accordingly, in our opinion, **the Share Scheme is fair and reasonable and in the best interests** of the SMX shareholders.

A significant assumption in our assessment the Share Scheme is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the shareholder meeting to approve the Share Scheme. Should redemptions be higher than 85% then our approach to the assessment of the fairness and reasonableness of the Share Scheme may change and this may affect our opinion on the fairness and reasonableness of the Share Scheme. In the event that redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

The ultimate decision on whether to approve the Share Scheme should be based on shareholders' own assessment of their circumstances. We strongly recommend that shareholders consult their own professional advisers, carefully read all relevant documentation provided, including the Scheme Booklet, and consider their own specific circumstances before voting in favour of or against the Share Scheme.

10. ASSESSMENT OF OPTION SCHEME

10.1 Fairness of the Option Scheme

As noted in section 5, in determining the fairness of the Option Scheme we have compared the fair value of a relevant SMX option on a control basis before the implementation of the Schemes to the fair value of the shares SMX optionholders will hold in Empatán on a minority basis after the implementation of the Schemes.

The table below shows the fair value of each option subject to the Option Scheme on a control basis and the fair value of shares that each SMX optionholder will hold in Empatán on implementation of the Scheme.

Expiry date	Number of options	Exercise Price	Fair value on a control basis			Number of SMX shares	Fair value of Empatán shares on minority basis per share

10.1.1 Fair value of options on a control basis before implementation of the Option Scheme

In determining the fair value of each option, the expiry date and exercise price are as set out in the table above. Other key assumptions applied in determining the fair value of the options prior to the implementation of the Options Scheme are as follows:

Fair value of an SMX Share

The fair value of a share on a control basis as set out in section 9.1.1 has been applied in determining the fair value of the options. As the underlying share price reflects a control premium and the option derives its value from the underlying security then the fair value of the option is also on a control basis.

Risk-free rate

The risk-free rate applied to each option reflects the following Australian government debt rates:

Debt term	Rate
Australia Government Debt - 2 Year	3.172%
Australia Government Debt - 3 Year	3.192%
Australia Government Debt - 5 Year	3.312%

Source: S&P Capital IQ at 17 January 2023

The relative risk-free rate applied to each option is based on the debt term nearest to the days to expiry for each option and an average if the period to expiry falls between debt-terms.

Volatility

The volatility rate applied reflects volatility in SMX's share price for the following periods to 25 July 2022, the last day of trading prior to announcement of the Schemes:

Volatility period	Rate
3 months	160%
6 months	138%
12 months	62%
24 months	66%

The relative volatility applied to each option is based on the volatility period nearest to the days to expiry for each option and an average if the period to expiry falls between volatility periods.

10.1.2 Fair value of shares held in Empatán following implementation of the Option Scheme

The fair value of shares held in Empatán after the implementation of the Schemes for each option is calculated as the number of SMX shares issued per option, divided by the exchange ratio set out in section 9.1.2 divided by the number of options for each expiry date.

As an example, for the 100,000 options maturing on 31 December 2024 with an exercise price of A\$0.50, the fair value of shares held on a minority basis is calculated as follows:

		Low	Preferred	High
Number of SMX shares received	A	77,003	77,003	77,003
Exchange ratio ⁽¹⁾	B	10.3624	10.3624	10.3624
Number of Empatán shares received	C=A / B	7,431	7,431	7,431
Fair value of an Empatán share after implementation of the Schemes ⁽²⁾	D	A\$3.26	A\$5.07	A\$6.43
Fair value of shares held after implementation of the Schemes	E=C x D	A\$24,242	A\$37,670	A\$47,787
Number of options held before implementation of the Schemes	F	100,000	100,000	100,000
Fair value of Empatán shares held per option	G=E / F	A\$0.24	A\$0.38	A\$0.48

(1) See section 9.1.2 for calculation of exchange ratio

(2) Fair value of a share in Empatán on a minority basis after implementation of the Schemes as set out in section 9.1.2.

10.1.3 Conclusion on fairness of the Option Scheme

As the fair value of Empatán shares on a minority basis held for each option is higher than the fair value of each option subject to the Option Scheme on a control basis prior to the implementation of the Schemes, **we have concluded that the Option Scheme is fair.**

A significant assumption in our assessment of fairness is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the optionholder meeting to approve the Option Scheme. Should redemptions be higher than 85% then our approach to the assessment of the fairness of the Option Scheme may change and this may affect our opinion on the fairness of the Option Scheme and whether or not it is in the shareholders' best interests. In the event that redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

10.2 Assessment of reasonableness of the Option Scheme

In considering the reasonableness of the Option Scheme, we note that the advantages and disadvantages as set out for the Share Scheme in section 9.2.2 and 9.2.3 along with the other considerations in 9.2.4, alternatives to the transaction in section 9.2.5 and implications of the transaction not proceeding in 9.2.6, are applicable.

The Option Scheme has the additional advantage for the SMX optionholders in that they receive shares in SMX and ultimately in Empatán without having to pay for the exercise of the options.

In accordance with RG 111, a transaction is reasonable if:

- the transaction is fair; or
- despite not being fair, but considering other significant factors, shareholders should obtain an overall benefit if the transaction proceeds.

As the Option Scheme is fair and, taking into account other significant factors, **we have concluded that the Option Scheme is reasonable.**

A significant assumption in our assessment of reasonableness is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the optionholder meeting to approve the Option Scheme. Should redemptions be higher than 85% then our approach to the assessment of the reasonableness of the Option Scheme may change and this may affect our opinion on the reasonableness of the Share Scheme. In the event that redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

10.3 Opinion on Option Scheme

Accordingly, in our opinion, **the Option Scheme is fair and reasonable and in the best interests of the SMX optionholders.**

A significant assumption in our assessment the Option Scheme is that redemptions are a maximum of 85%. The level of redemptions will not be known until just prior to the optionholder meeting to approve the Option Scheme. Should redemptions be higher than 85% then our approach to the assessment of the fairness and reasonableness of the Option Scheme may change and this may affect our opinion on the fairness and reasonableness of the Option Scheme and whether or not it is in the optionholders' best interests. In the event that

redemptions are more than 85% we will be issuing a second supplementary report, which will supersede our opinion in this Supplementary Report.

The ultimate decision on whether to approve the Option Scheme should be based on optionholders' own assessment of their circumstances. We strongly recommend that optionholders consult their own professional advisers, carefully read all relevant documentation provided, including the Scheme Booklet, and consider their own specific circumstances before voting in favour of or against the Option Scheme.

APPENDIX C - STATEMENT OF DECLARATION & QUALIFICATIONS

Confirmation of Independence

Prior to accepting this engagement Nexia Sydney Corporate Advisory Pty Ltd ("NSCA") determined its independence with respect to SMX and Lionheart with reference to ASIC Regulatory Guide 112: Independence of Experts ("RG 112"). NSCA considers that it meets the requirements of RG 112 and that it is independent of SMX and Lionheart.

Also, in accordance with s648(2) of the Corporations Act, we confirm we are not aware of any business relationship or financial interest of a material nature with SMX or Lionheart, its related parties or associates that would compromise our impartiality.

Mr Brent Goldman, authorised representative of NSCA, has prepared this Supplementary Report. Neither he nor any related entities of NSCA have any interest in the promotion of the Schemes nor will NSCA receive any benefits, other than normal professional fees, directly or indirectly, for or in connection with the preparation of this Supplementary Report. Our fee is not contingent upon the success or failure of the Schemes, and has been calculated with reference to time spent on the engagement at normal professional fee rates for work of this type. Accordingly, NSCA does not have any pecuniary interests that could reasonably be regarded as being capable of affecting our ability to give an unbiased opinion under this engagement.

NSCA provided a draft copy of this Supplementary Report to the Directors and management of SMX for their comment as to factual accuracy, as opposed to opinions, which are the responsibility of NSCA alone. Changes made to this Supplementary Report, as a result of the review by the Directors and management of SMX, have not changed the methodology or conclusions reached by NSCA.

Qualifications

NSCA carries on business at Level 16, 1 Market Street, Sydney NSW 2000. NSCA is an authorised corporate representative of Nexia Sydney Financial Solutions Pty Ltd, which holds Australian Financial Services Licence No 247300 authorising it to provide financial product advice on securities to retail clients. NSCA's representatives are therefore qualified to provide this Supplementary Report.

Brent Goldman specifically was involved in preparing and reviewing this Supplementary Report. Brent Goldman is a Fellow of the Institute of Chartered Accountants in Australia and New Zealand, a Business Valuation Specialist of the Institute of Chartered Accountants in Australia and New Zealand and a Fellow of the Financial Services Institute of Australasia. He has over 20 years of corporate finance experience in both Australia and the UK.

Consent and Disclaimers

The preparation of this Supplementary Report has been undertaken at the request of the Independent Directors of SMX. It also has regard to relevant ASIC Regulatory Guides. It is not intended that the Supplementary Report should be used for any other purpose than to accompany the Scheme Booklet to be sent to SMX shareholders and optionholders. In particular, it is not intended that this Supplementary Report should be used for any purpose other than as an expression of NSCA's opinion as to whether or not the Schemes are fair and reasonable and in the best interests of SMX's shareholders and optionholders.

NSCA consents to the issue of this Supplementary Report in the form and context in which it is included in the Scheme Booklet to be sent to SMX's shareholders and optionholders.

Shareholders and optionholders should read all documents issued by SMX and consider the options in their entirety, prior to proceeding with a decision. NSCA had no involvement in the preparation of these documents, with the exception of our Supplementary Report.

This Supplementary Report has been prepared specifically for the shareholders and optionholders of SMX. Neither NSCA, nor any member or employee thereof undertakes responsibility to any person, other than a shareholder or optionholder of SMX, in respect of this Supplementary Report, including any errors or omissions howsoever caused. This Supplementary Report is "General Advice" and does not take into account any person's particular investment objectives, financial situation and particular needs. Before making an investment decision based on this advice, you should consider, with or without the assistance of a securities advisor, whether it is appropriate to your particular investment needs, objectives and financial circumstances.

APES 225

Our report has been prepared in accordance with APES 225 Valuation Services.

APPENDIX D - VALUATION METHODOLOGIES

In preparing this Supplementary Report we have considered valuation methods commonly used in practice and those recommended by RG 111. These methods include:

- the discounted cash flow method;
- the capitalisation of earnings method;
- asset based methods; and
- analysis of share market trading.

Discounted Cash Flow Method

Description

Of the various methods noted above, the discounted cash flow method has the strongest theoretical standing. It is also widely used in practice by corporate acquirers and company analysts. The discounted cash flow method estimates the value of a business by discounting expected future cash flows to a present value using an appropriate discount rate. A discounted cash flow valuation requires:

- a forecast of expected future cash flows;
- an appropriate discount rate; and
- an estimate of terminal value.

It is necessary to project cash flows over a suitable period of time (generally regarded as being at least five years) to arrive at the net cash flow in each period. For a finite life project or asset this would need to be done for the life of the project. This can be a difficult exercise requiring a significant number of assumptions such as revenue growth, future margins, capital expenditure requirements, working capital movements and taxation.

The discount rate used represents the risk of achieving the projected future cash flows and the time value of money. The projected future cash flows are then valued in current day terms using the discount rate selected.

A terminal value reflects the value of cash flows that will arise beyond the explicit forecast period. This is commonly estimated using either a constant growth assumption or a multiple of earnings (as described under capitalisation of future maintainable earnings below). This terminal value is then discounted to current day terms and added to the net present value of the forecast cash flows.

The discounted cash flow method is often sensitive to a number of key assumptions such as revenue growth, future margins, capital investment, terminal growth and the discount rate. All of these assumptions can be highly subjective, sometimes leading to a valuation conclusion presented as a range that is too wide to be useful.

Use of the Discounted Cash Flow Method

A discounted cash flow approach is usually preferred when valuing:

- early stage companies or projects;
- limited life assets such as a mine or toll concession;
- companies where significant growth is expected in future cash flows; or
- projects with volatile earnings.

It may also be preferred if other methods are not suitable, for example if there is a lack of reliable evidence to support a capitalisation of earnings approach. However, it may not be appropriate if reliable forecasts of cash flow are not available and cannot be determined.

Capitalisation of Earnings Method

Description

The capitalisation of earnings method is a commonly used valuation methodology that involves determining a future maintainable earnings figure for a business and multiplying that figure by an appropriate capitalisation multiple. This methodology is generally considered a short form of a discounted cash flow, where a single representative earnings figure is capitalised, rather than a stream of individual cash flows being discounted. The capitalisation of earnings methodology involves the determination of:

- a level of future maintainable earnings; and
- an appropriate capitalisation rate or multiple.

A multiple can be applied to any of the following measures of earnings:

Revenue – most commonly used for companies that do not make a positive EBITDA or as a cross-check of a valuation conclusion derived using another method.

EBITDA - most appropriate where depreciation distorts earnings, for example in a company that has a significant level of depreciating assets but little ongoing capital expenditure requirement.

EBIT - in most cases EBIT will be more reliable than EBITDA as it takes account of the capital intensity of the business.

NPAT - relevant in valuing businesses where interest is a major part of the overall earnings of the group (e.g. financial services businesses such as banks).

Multiples of EBITDA, EBITA and EBIT value the whole businesses, or its enterprise value irrespective of the gearing structure. NPAT (or P/E) values the equity of a business

The multiple selected to apply to maintainable earnings reflects expectations about future growth, risk and the time value of money all wrapped up in a single number. Multiples can be derived from three main sources.

Using the guideline public company method, market multiples are derived from the trading prices of stocks of companies that are engaged in the same or similar lines of business and that are actively traded on a free and open market, such as the ASX or the NSX. The merger and acquisition method is a method whereby

multiples are derived from transactions of significant interests in companies engaged in the same or similar lines of business. In Australia this has been called the comparable transaction methodology.

Use of the Capitalisation of Earnings Method

The capitalisation of earnings method is widely used in practice. It is particularly appropriate for valuing companies with a relatively stable historical earnings pattern which is expected to continue. This method is less appropriate for valuing companies or assets if:

- there are no suitable listed company or transaction benchmarks for comparison;
- the asset has a limited life;
- future earnings or cash flows are expected to be volatile; or
- there are negative earnings or the earnings of a business are insufficient to justify a value exceeding the value of the underlying net assets.

Asset Based Methods

Description

Asset based valuation methods estimate the value of a company based on the realisable value of its net assets, less its liabilities. There are a number of asset based methods including:

- orderly realisation;
- liquidation value;
- net assets on a going concern basis;
- replacement cost; and
- reproduction cost.

The orderly realisation of assets method estimates Fair Market Value by determining the amount that would be distributed to shareholders, after payment of all liabilities including realisation costs and taxation charges that arise, assuming the company is wound up in an orderly manner. The liquidation method is similar to the orderly realisation of assets method except the liquidation method assumes the assets are sold in a shorter time frame.

Since wind up or liquidation of the company may not be contemplated, these methods in their strictest form may not necessarily be appropriate. The net assets on a going concern basis method estimates the market values of the net assets of a company but does not take account of realisation costs.

The asset / cost approach is generally used when the value of the business's assets exceeds the present value of the cash flows expected to be derived from the ongoing business operations, or the nature of the business is to hold or invest in assets. It is important to note that the asset approach may still be the relevant approach even if an asset is making a profit. If an asset is making less than an economic rate of return and there is no realistic prospect of it making an economic return in the foreseeable future, an asset approach would be the most appropriate method.

Use of Asset Based Methods

An asset-based approach is a suitable valuation method when:

- an enterprise is loss making and is not expected to become profitable in the foreseeable future;
- assets are employed profitably but earn less than the cost of capital;
- a significant portion of the company's assets are composed of liquid assets or other investments (such as marketable securities and real estate investments); or
- it is relatively easy to enter the industry (for example, small machine shops and retail establishments).

Asset based methods are not appropriate if:

- the ownership interest being valued is not a controlling interest, has no ability to cause the sale of the company's assets and the major holders are not planning to sell the company's assets; or
- a business has (or is expected to have) an adequate return on capital, such that the value of its future income stream exceeds the value of its assets.

Analysis of Share Trading

The most recent share trading history provides evidence of the Fair Market Value of the shares in a company where they are publicly traded in an informed and liquid market. There should also be some similarity between the size of the parcel of shares being valued and those being traded. Where a company's shares are publicly traded then an analysis of recent trading prices should be considered, at least as a cross-check to other valuation methods.

Background

- A. The parties are parties to the SID.
- B. The parties varied the SID by way of a Deed of Variation on 8 January ("First Deed")
- C. The parties wish to further vary the SID as set out in this Deed

Agreed terms

1. Definitions and interpretation

1.1 Definitions

- (a) In this Deed:

ASIC means Australian Securities and Investments Committee;

Business Day means a day that is not a Saturday, Sunday, public holiday or bank holiday in Melbourne;

Deed means this deed including the background, any schedules and any annexures;

Effective Date means the date of this deed;

First Deed means the Deed of Variation executed by the parties on or about 8 January 2023

SID means the Scheme Implementation Deed made between the parties and dated 26 July 2022; and

- (b) Unless otherwise indicated, words or expressions defined in the Deed have the same meaning in this deed.

1.2 Interpretation

In this Deed, unless the context requires otherwise:

- (a) the singular includes the plural and vice versa;
- (b) a gender includes the other genders;
- (c) headings are used for convenience only and do not affect the interpretation of this Deed;
- (d) other grammatical forms of a defined word or expression have a corresponding meaning;
- (e) a reference to a document is to that document as amended, novated, supplemented, extended or restated from time to time;
- (f) a reference to a party is to a party to this deed and includes that party's executors, administrators, successors, permitted assigns and permitted substitutes;
- (g) "person" includes a natural person, partnership, body corporate, association, joint venture, governmental or local authority, and any other body or entity whether incorporated or not;

- (i) "include", "for example" and any similar expressions are not used, and must not be interpreted, as words of limitation;
- (j) a reference to any agency or body that ceases to exist, is reconstituted, renamed or replaced, or has its powers or functions removed (**defunct body**) is to the agency or body that performs most closely the powers or functions of the defunct body;
- (k) any provision in this Deed which is in favour of more than one person benefits all of them jointly and each of them severally; and
- (l) any provision in this Deed which binds more than one person binds all of them jointly and each of them severally.

2. Further Variation of SID

2.1 Variation

With effect on and from the Effective Date, the SID is varied as follows:

- (a) modify the definition of **encumbrances** to add '*with the exclusion of security granted pursuant to bridge loans disclosed in the Scheme Booklet*'
- (b) the parties acknowledge that the share capital of SMX has changed since the execution of the SID and the First Deed and the changes set out below are to replace the incorrect share capital currently contained in the First Deed:
 - (i) a total of 167,854,581 SMX Shares on issue;
 - (ii) a total of 32,122,957 SMX Options on issue; and
 - (iii) a total of 13,914,114 ESOP Options on issue.

- (c) The parties acknowledge that Michal Firstinberg holds 77,025 options, and has paid the exercise price for them. As such, prior to the implementation of the SID, she will be issued with shares which shall immediately convert as part of the scheme.

2.2 Confirmation of the SID

All provisions of the SID other than those varied by clause 2.1 or varied by the First Deed remain unchanged and continue in full force.

3. General

3.1 Severability

Any provision of this Deed which is invalid in any jurisdiction must, in relation to that jurisdiction:

- (a) be read down to the minimum extent necessary to achieve its validity, if applicable; and
- (b) be severed from this Deed in any other case,

without invalidating or affecting the remaining provisions of this Deed or the validity of that provision in any other jurisdiction.

3.2 No variation

This Deed cannot be amended or varied except in writing signed by the parties.

3.3 Execution and delivery

By executing this Deed, a party intends:

- (i) to be immediately bound by this Deed; and
 - (ii) for such execution to constitute delivery of this Deed to each other party.
- (b) Nothing in this clause 3.3 should be taken to exclude any statutory or common law principle applicable to the proper execution and delivery of a deed.
 - (c) This clause 3.3 supersedes, terminates and replaces any prior agreements and communications between the parties which indicate that the agreements recorded in this Deed are "subject to contract" or similar arrangements.

3.4 Counterparts

If this Deed consists of a number of signed counterparts, each is an original and all of the counterparts together constitute the same document. A party may sign a counterpart by executing a signature page and electronically transmitting a copy of the signed page to each other party or their authorised representative. Signatures on behalf of one party that are on different counterparts will be taken to be, and have the same effect as, signatures on the same counterpart and on a single copy of this Deed.

3.5 Governing law and jurisdiction

- (a) This Deed is governed by and must be construed in accordance with the laws of Victoria.
- (b) The parties submit to the exclusive jurisdiction of the courts of that State and the Commonwealth of Australia in respect of all matters arising out of or relating to this Deed, its performance or subject matter.
